**DETAILED ACTION**

***Election/Restrictions***

After further review of the claims, the new Examiner of record has determined another restriction is necessary.

The inventions are distinct, each from the other because of the following reasons:

1. Restriction to one of the following inventions is required under 35 U.S.C 121:
  - I. Claims 1-15, drawn to an electrical assembly, classified in class 361, subclass 836.
  - II. Claims 16-18, drawn to a cross-talk compensation circuit, classified in class 174, subclass 261.

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions I & II are separated and distinct as Invention I sets forth an assembly comprising a transformer on printed circuit board in class 361/836. Invention II is directed toward to cross-talk compensation circuit which has nothing whatsoever to do with a transformer on a printed circuit board.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thanh Y. Tran whose telephone number is (703)305-4757. The examiner can normally be reached on M-F (9-6:30pm).
